At most An Ethic of Excellence: Building a Culture of Craftsmanship with Students high schools, teachers would have to maintain a certain pace while covering a large curriculum. My students are mostly white, rural kids; the students and staffs I work

The author gives us a vision of educational reform that transcends standards, curriculum, and instructional strategies. He argues for a paradigm shift—a schoolwide embrace of an "ethic of excellence" and with a passion for quality describes what's possible when teachers, students, and parents commit to nothing less than the best. The author tells exactly how this can be done, from the blackboard to the blacktop to the school boardroom.

From Expeditionary Learning Schools comes a proven approach to student assessment Leaders of Their Own Learning offers a new way of thinking about assessment based on the celebrated work of Expeditionary Learning Schools across the country. Student – Engaged Assessment is not a single practice but an approach to teaching and learning that equips and compels students to understand goals for their learning and growth, track their progress toward those goals, and take responsibility for reaching them. This requires a set of interrelated strategies and structures and a whole – school culture in which students are given the respect and responsibility to be meaningfully engaged in their own learning. Includes everything teachers and school leaders need to implement a successful Student – Engaged Assessment system in their schools Outlines the practices that will engage students in making academic progress, improve achievement, and involve families and communities in the life of the school Describes each of the book ' s eight key practices, gives advice on how to begin, and explains what teachers and school leaders need to put into practice in their own classrooms Ron Berger is Chief Program Officer for Expeditionary Learning and former public school teacher Leaders of Their Own Learning shows educators how to ignite the capacity of students to take responsibility for their own learning, meet Common Core and state standards, and reach higher levels of achievement. DVD and other supplementary materials are not included as part of the e – book file, but are available for download after purchase.

In Learning and Leading with Habits of Mind, noted educators Arthur L. Costa and Bena Kallick present a comprehensive guide to shaping schools around Habits of Mind. The habits are a repertoire of behaviors that help both students and teachers successfully navigate the various challenges and problems they encounter in the classroom and in everyday life. The Habits of Mind include * Persisting * Managing impulsivity * Listening with understanding and empathy * Thinking flexibly * Thinking about thinking (metacognition) * Striving for accuracy * Questioning and posing problems * Applying past knowledge to new situations * Thinking and communicating with clarity and precision * Gathering data through all senses * Creating, imagining, innovating * Responding with wonderment and awe * Taking responsible risks * Finding humor * Thinking interdependently * Remaining open to continuous learning This volume brings together--in a revised and expanded format--concepts from the four books in Costa and Kallick's earlier work Habits of Mind: A Developmental Series. Along with other highly respected scholars and practitioners, the authors explain how the 16 Habits of Mind dovetail with up-to-date concepts of what constitutes intelligence; present instructional strategies for activating the habits and creating a "thought-full" classroom environment; offer assessment and reporting strategies that incorporate the habits; and provide real-life examples of how communities, school districts, building administrators, and teachers can integrate the habits into their school culture. Drawing upon their research and work over many years, in many countries, Costa and Kallick present a compelling rationale for using the Habits of Mind as a foundation for leading, teaching, learning, and living well in a complex world.

Based on the successful methods of Dealous Cox, this book describes a leadership philosophy based on the search for wisdom through personal reflection and community.

Written as a textbook for courses on teaching at the college and seminary level, Called to Teach actually reaches out to a much wider audience. Those considering a teaching career, homeschoolers and parents will gain valuable insight and knowledge from Yount's latest book.

Building on both cutting-edge research and professional learning practice, Amanda Datnow and Vicki Park explore how professional collaboration can support deeper learning for students and teachers alike. While many schools and systems support teacher collaboration, they often fall short of their intended goals of improving teaching and learning. This book provides concrete guidance for creating the conditions for collaboration in which teachers are

moved toward—rather than repelled—by joint work. The authors explore how collaborative settings can provide a space for working through the inevitable challenges that accompany the changing nature of teaching in the age of accountability and show the motivation, inspiration, and energy that teachers personally--and collectively--gain from collaborating to improve student learning. Ultimately, they show how teacher empowerment towards working together builds equitable and excellent learning environments.

"At its best, discussion teaching has an extraordinary ability to stimulate learning. Through a skillful orchestration of questioning, listening, and response it helps students master course material and critical judgment skills in tandem. Education For Judgment unravels the intricacies of successful group leadership and shows how you can consciously practice those elements that turn an average class into a great one. You'll discover practical advice on how to negotiate a 'contract' for the conduct of the group, how to lead a discussion without stalling it, getting students to talk to each other, guiding participants to adopt new and thoughtful roles, the ethics involved in choosing material, how to encourage independent thinking, structuring technical material, how to evaluate student participation, creating a sense of closure and accomplishment, much, much more"--Unedited summary from book cover.

In a seemingly tumultuous time of political change, caring and healing are needed now more than ever. This is especially true in education, which has been criticized for a disproportionate focus on the technical aspects of teaching with less focus on its “ human ” aspects. Creating Caring and Supportive Educational Environments for Meaningful Learning is a collection of innovative research on the practical and theoretical questions involved in organizing traditional and nontraditional areas of study around themes of care and support for students within the framework of current educational systems and standards. While highlighting topics including service learning, ethics of care, and student mental health, this book is ideally designed for teachers, administrators, researchers, and academicians seeking current research on the importance and ethics of the human aspects of education.
