# Online Library It Capability

## The Capability

Maturity Model is a development model created in 1986 after a study of data collected from organizations that contracted with the U.S. Department of Defense, who funded the research. The term "maturity" relates to the degree of formality and optimization of processes, from ad hoc

# Online Library It Capability

practices, to formally defined steps, to managed result metrics, to active optimization of the processes. The model's aim is to improve existing software development processes, but it can also be applied

Capability Maturity

Model - Wikipedia

The Digital Maturity

# Online Library It Capability

Model is a framework used to understand how digitally mature an organization is today, and to help build a roadmap for the future. Google and Boston Consulting Group collaborated to build the model which consists of four stages, Nascent, Emerging, Connected, and Multi-Moment.
