"I am a magnificent failure," Ashton Kutcher announced on the TEDYouth stage in New Orleans earlier today. "I screw up so much it hurts." The star of television show Two and a Half Men said this not to be self-deprecating or to beat up on himself, but to drive home the point that failure is a part of life — and one that can prompt profound "aha" moments.

longitude of the western Dakotas became available to pioneering farmers. More than 70 black-and-white duotone photographs, with detailed captions, record bleak landscapes and abandoned farms, outbuildings, farm implements, and hand tools—mute testimonies to the failed hopes of several million families who settled on these arid and semi-arid lands. Campbell explains how their failure resulted from a deadly combination of natural and economic causes. Historians of the western United States have largely ignored the homesteaders, despite the lessons their experiences teach about irrigation and dry farming on the northern plains and the impact of the Great Depression and Dust Bowl. There is little romance in farming, especially when compared with that attached to cowboys, Indians, and explorers. Still, the homesteaders were heroes in the opening of the West, and this book, with its moving text, historical introduction, and stunning photographs, tells their story.

Locked in a desperate Cold War race against the Soviets to find out if humans could survive in space and live through a free fall from space vehicles, the Pentagon gave civilian adventurer Nick Piantanida's Project Strato-Jump little notice until May Day, 1966. Operating in the shadows of well-funded, high-visibility Air Force and Navy projects, the former truck driver and pet store owner set a new world record for manned balloon altitude. Rising more than 23 miles over the South Dakota prairie, Piantanida nearly perished trying to set the world record for the highest free fall parachute jump from that height. On his next attempt, he would not be so lucky. Part harrowing

They say the only certainties in life are death and taxes. I would add a third: mistakes. We all commit errors - often small ones, sometimes big ones, and all too frequently the same ones. What if you learned it was actually crucially important to learn from our mistakes? What if you discovered that the most successful people and organizations in the world did just that, and it is often one of the secrets to their success? What if someone gave you a simple tool - a six-step checklist captured in the acronym M.A.S.T.E.R. - which you could use to quickly draw the

right lessons from both little miscues and massive failures? Finally, what if you were taught 12 key habits that your team or organization could implement to harness the power of failure? Whether you're an entrepreneur, an employee or an executive, this book is for you. All winners in sports, business and life consistently and systematically learn from their mistakes. It's also the fastest, simplest, most powerful and yet least practiced way to improve you or your organization's performance. We know intuitively we should learn from our missteps. However, very few of us actually do, and that itself is a huge error. Discover what Michael Phelps, Warren Buffett, Amazon and Delta Force have in common in "The Magnificent Mistake."

"Reveals much of what history has tended to gloss over . . . should be a must read for all who have an interest in this operation" (Airborne Quarterly). After Normandy, the most spectacular Allied offensive of World War II was Operation Market Garden, which planned to join three divisions of paratroopers dropped behind German lines with massive armored columns breaking through the front. The object was to seize a crossing over the Rhine to outflank the heartland of the Third Reich and force a quick end to the war. The operation utterly failed, of course, as the 1st British Airborne was practically wiped out, the American 82nd and 101st Airborne Divisions became

tied down in vicious combat for months, and the vaunted armored columns were foiled at every turn by improvisational German defenses. Some have called the battle "Hitler's last victory." In this work, many years in the making, David Bennett puts forward a balanced and comprehensive account of the British, American, Polish, Canadian, and German actions, as well as the strategic background of the operation, in a way not yet done. He shows, for example, that rather than a bridgehead over the Rhine, Montgomery's ultimate aim was to flank the Ruhr industrial area from the north. The book also deals as never before with the key role of all three Corps of British Second Army, not just Brian Horrocks' central XXX Corps. For the first time, we learn the dramatic untold story of how a single company of Canadian engineers achieved the evacuation of 1st Airborne's survivors back across the Rhine when all other efforts had failed. Also revealed is the scandal of how Polish Gen. Sosabowski was treated by the British military authorities, and how the operation would have failed at the outset but for the brilliant soldiery of the two American airborne divisions. Respectfully nodding to *A Bridge Too Far* and other excellent works on Market Garden, the author has interviewed survivors, walked the ground, and performed prodigious archival research to increase our understanding of the battle, from the actions of the lowliest soldier to the highest commander, Allied and German.

This study examines Defoe's three-volume Robinson Crusoe series in the light of the 'banter' style he developed as a pamphleteer. That heavily ironic style had brought him renown but also put him in the pillory. The present study explores for the first time Defoe's complaint that readers and pirate abridgers misread his tale of the would-be trader Robinson Crusoe. Using Discourse Analysis and Relevance Theory to examine the early abridgements of Volume I and Defoe's subsequent two volumes, this study argues that Defoe's greatest success is also a peculiar failure.
