"Texts must be interesting enough for students to want to read them in their own language. Otherwise, how can we expect students to want to read them in English?" This is the authors' golden rule when they choose texts and topics for every level of American English File. It ensures you get material that learners will enjoy reading and will want to talk about. Texts such as "Could you live without money?" really help to generate opinion and discussion. They create a desire to communicate. Having created the desire, American English File then helps you to develop learners' communication skills. One way it does this is with a strong focus on pronunciation. Research shows that poor pronunciation is a major contributor to breakdowns in communication (Jennifer Jenkins: The Phonology of English as an International Language). American English File integrates pronunciation into every lesson - the "little and often" approach. But that's not all. The unique English File Sounds Chart puts a picture to each sound in the phonetic alphabet, so learners find it easier to remember the sounds and, ultimately, improve their pronunciation.

Many teachers in regular classrooms feel unprepared to teach students with learning disabilities. Fortunately, brain research has confirmed that strategies benefiting learners with special challenges are suited for engaging and stimulating all learners. In this book, neurologist and classroom teacher Judy Willis explains that we can best help students by putting in place strategies, accommodations, and interventions that provide developmentally and academically appropriate challenges to suit the needs, gifts, and goals of each student. Brain-Friendly Strategies for the Inclusion Classroom will help teachers * Understand how the brain learns and the technologies that reveal this process. * Implement strategies that are compatible with students' individual learning styles and honor their multiple intelligences. * Improve the focus of students with attention disorders and help them gain the confidence and skills they need to develop goal-oriented behaviors. * Create an enriching learning environment by incorporating student-centered activities, discovery and hands-on learning experiences, cross-curricular learning, and multisensory lessons. * Implement strategic review, study, and test preparation strategies that will allow students to retain information and connect it with future learning. * Build safe, supportive classroom communities and raise class awareness and empathy for students with learning disabilities. It's time for teachers to lower the barriers, not the bar. Using strategies that align with research on how people's brains function, teachers can engage all students as individuals and help them reach their maximum potential with joy and confidence.
